Purpose of this document

The purpose of this document is to call out the significant changes that have been made to the course from its most previous version. This document is meant to be used by the MCTs/Instructors before delivering the class or during the prep to understand what has changed from the previous version of this course.

This is not an Error Log or a supplement to the Course Materials. This is purely meant to provide additional context between the two versions of the course.

What you can expect in this document

This change log captures changes from the previous version in the following four main areas:

1. Design (Outline)
2. Lecture and Lab Content (Handbook, PPT, LAK)
3. Labs (VMs)
4. Change Description for Learning Product Spec Changes

The revision descriptions are intended to be provided at a high-level and not at a detailed level, so that they give you an overall understanding of the topics that have changed and the reasoning behind the change.

For More Information

To view the current Change Log for this product, visit the MCT Download Center, and then browse to the appropriate product folder, and then product name.

For any queries please write to support@mscourseware.com.

Change Description for Design (Outline)

This course is the RTM release update to course 20761A – Querying Data with Transact-SQL. Additionally the course content has been reviewed against the Objective Domain for exam 70-761 and the design amended where appropriate.

Change Description for Lecture and Lab Content (Handbook, PPT, LAK)

Modifications have been made throughout to remove errors, remove reference to SQL Server 2016 CTP3.3, and change the course number to 20761B. In addition:

Module 12

New optional module for students that are preparing for exam 70-761.

Module 13

New optional module for students that are preparing for exam 70-761.

Module 14

New optional module for students that are preparing for exam 70-761.

Module 15

New optional module for students that are preparing for exam 70-761.

Module 16

New optional module for students that are preparing for exam 70-761.

Module 17

New optional module for students that are preparing for exam 70-761.

Module 18

New optional module for students that are preparing for exam 70-761.

Change Description for Virtual Environment

The virtual machines for this course have been revised to include the RTM version of SQL Server 2016, with Cumulative Update 1 Version 13.0.2149.0. Plus, SQL Server Data Tools version 14.0.60812.0 and SQL Server Management Studio version 16 are installed.

The format of the files has been changed to include a Setupfiles folder which contains any databases required for the course. This removes the necessity to include duplicate copies of databases for demonstrations and labs.

Change Description for Learning Product Spec Changes

The audience for this course is the same as that of 20761A, and the objectives remain the same.
